

Lubecore Technical Announcement

Progressive Divider Valve Plugs – Torque Specification Update

Lubecore is updating the recommended torque specification for the 20.253 progressive divider valve plug. This stainless-steel plug was released earlier in 2020 (LCC2020-005).

The new torque specification for the plugs when installing them in the progressive divider valves is 250 in-lbs. (28Nm). Use a torque wrench to ensure a consistent fastening.

Figure 1 20.253 plugs

Part Number	Torque Spec.
20.253	250 in-lbs. / 28 Nm.
