

Compact

NEXT GENERATION AUTOMATED LUBRICATION

2kg Bambino Pump

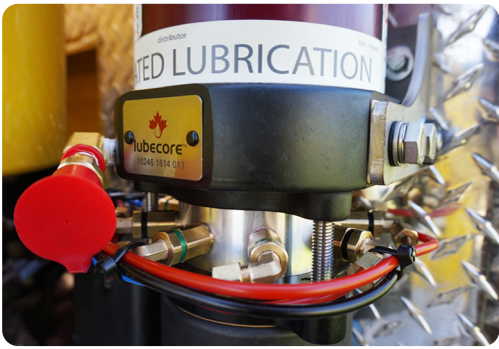

- Extend Your Component Life Using EP2 Grease
- Built In Heavy Duty Filter
- Clear 2kg - Break-proof Makrolon™ Reservoir
- Stainless Steel Follower Plate With PIP™ Spring - Provides Clear Grease Level Indication
- Available In 12 & 24 VDC
- Automatic Low Level Shut Down - (Optional)
- Fully Potted Magnetic Programmable Timer Is Protected From The Environment
- Heavy Duty Stainless Steel Insulated Mounting System
- Front Mounted LED Indicates Power/Cycle/Mode
- Modular Compatibility For Abundant Pump Configurations - Multi-line or Progressive

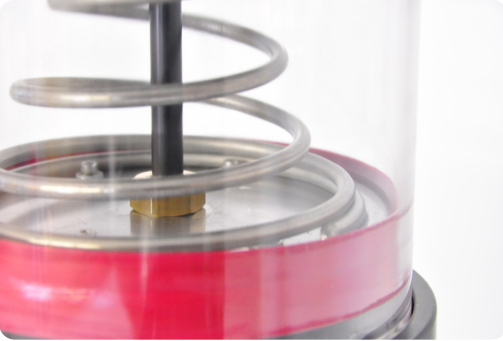

Equipment continues to become more compact “So where can an automated lubrication system fit?”

Lubecore has the solution with this next-generation lubrication system, the Bambino.

This addition to Lubecore’s proven Modular Pump series is compact, powerful, and durable, and adds to the variety of configuration options across our product line.

Multi-Line or Progressive

Pressurized Reservoir

2kg Bambino Pump

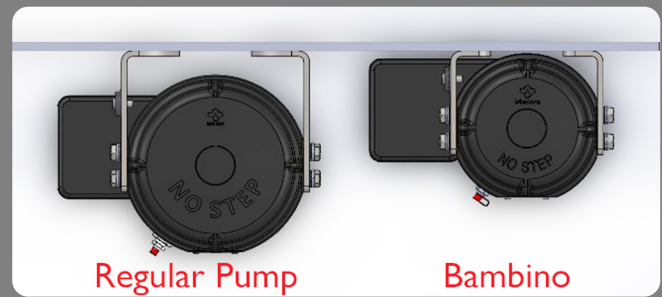

The 2kg Bambino sets the standard for the next generation of compact Automatic Lubrication Systems. With the same durable, powerful, and customizable features as other Lubecore pumps it shows that size doesn't have to be a compromise for quality.

Bambino Modular ALS significantly reduces wear on compact equipments' components such as:

- On Road: 5th Wheel Plate, King Pins, etc.
- Off Road: Cylinders, Pins, and Bushings, etc.

The Bambino supports current non-corrosive bracket patterns, adds a robust aluminum lid for durability in harsh working environments, and keeps the signature break-proof Makrolon™ Reservoir.

Toughest Compact Pump On The Market
