

Why Lubecore?

Pneumatic Single Line 210 Out-Spec Guide – Front Mounted Timer

Fact	Benefit	Lubecore Pneumatic	GV Single Line EP-0
Positive Inlet Pressure Top Spring	<ul style="list-style-type: none"> * Consistent EP-2 grease delivery even at extreme low temperatures * Automatic bleeding 	✓	✗
Brass Super Injectors	<ul style="list-style-type: none"> * No corrosion of metering valves * Low maintenance cost * Ease of identification 	✓	✓
Self Bleeding Injectors	<ul style="list-style-type: none"> * Injectors resist air lock and do not require bleeding * No costly bleeding service required * Reduced bearing failure and cost 	✓	✗
Corrosion Resistant Mounting System	<ul style="list-style-type: none"> * No replacing pumps * Low maintenance * No galvanic corrosion of pump body 	✓	✓
Stainless Steel Follower Plate with Leak Proof Red Silicon	<ul style="list-style-type: none"> * Clear grease level indication * No grease funnelling * Protects grease from moisture & dirt 	✓	✗
Makrolon® Reservoir	<ul style="list-style-type: none"> * Breakproof - no maintenance * Remains clear for life 	✓	✗
Automatic Low Level Shut-Off Option	<ul style="list-style-type: none"> * Pump doesn't run empty * Never bleed the system * Save time and money 	✓	✓
Pressurized Housing Between Cycles	<ul style="list-style-type: none"> * Positive pressure inhibits the entrance of foreign material 	✓	✗
Aluminum Pump Housing	<ul style="list-style-type: none"> * No deformation at high temperature * No corrosion of pump housing 	✓	✓
Optional Heavy Duty Inline Filter	<ul style="list-style-type: none"> * Prevents system clogging * Will stop an air operated fill gun 	✓	✗
Adjustable Run and Pause Cycles	<ul style="list-style-type: none"> * Optimize grease consumption * Precision lubrication saves components 	✓	✓
Fully Submersible Potted Timer	<ul style="list-style-type: none"> * Timer protected from moisture and dust * Sealed against road salts and brines preventing corrosion 	✓	✗
Timer LED Communication	<ul style="list-style-type: none"> * Clear signal of power and ground at the pump * Easy to program, test, and troubleshoot * Reduces system inspection time 	✓	✗
Reinstallable Pump	<ul style="list-style-type: none"> * Pump is built to outlast equipment * Recycle by reinstalling on next unit * Reduced environmental impact 	✓	✗
Magnet Controlled Timer Mounted to Pump	<ul style="list-style-type: none"> * Easy to program at the pump – no lost time searching cab * Simple single cycle and continuous cycle test at the pump * Convenient mounting location for magnet – stays with pump 	✓	✗
Korilla Line Option	<ul style="list-style-type: none"> * Extreme duty flex hose * No broken line maintenance required guaranteed 	✓	✗
Pressure Gauge Standard	<ul style="list-style-type: none"> * Easy to confirm system operation at the pump 	✓	✗
