

Lubecore Product Announcement

Servicing Groeneveld Twin Systems

Making a JIC#4 Connection on a GV Twin Pump allowing for the use of Lubecore Korilla hose to repair G.V Mainlines.

Lubecore services all makes and models of automated greasing systems.

Adapting a GV twin outlet to #4 JIC

Adapting a GV twin outlet to #4 JIC makes it simple to use our high pressure large Korilla lining. To replace or repair existing GV mainline.

Required Parts to Convert GV outlet to #4 JIC – Kit # 54.565

Name	Lubecore Part #	Quantity
Ferrule 10mm	21.273	2
Tube Nut 10mm	21.274	2
Male JIC #4 X Metric 10mm stand pipe	21.275	2

Lubecore Product Announcement

Connecting Lubecore 1/4 ID Large Korilla

Figure 1

Required Parts to Connect Lubecore Mainline		
Name	Lubecore Part #	Quantity
Lubecore Korilla 1/4 ID- Filled	30.254	20ft
S.S clamp Lubecore Korilla 1/4 ID	20.233	4
#4 JIC connector for Large Korilla	21.247	4

Correct Placement of S.S Clamps

Correctly positioning the S.S clamps as displayed in **Figure 2 below** will ensure the mainline is securely locked in place, preventing the mainline from blowing off.
