

Lubecore Communication

Subject: BSP Fittings

It was recently discovered that Lubecore International did not have a fitting to accommodate a need in the field. A customer was in the need of a BSP threaded fitting for an application on a HIAB crane. There were bushings that had a female BSP hole. Because of the difficult location of this bushing, the customer had to use an extension to run the grease line to that point. The issue they encountered was that our cube fittings and straight adapters have NPT threads on them and would not go into the hole where needed. They in turn used a fitting from a competitor and we felt there was a need that we had to fill.

To solve the problem, we have produced 5 new fittings with the proper BSP threads to accommodate this situation when it arises. Please see the listing of new part numbers and their descriptions below. As you can see in the pictures provided, these parts are notched to make it easy to distinguish these parts from an NPT threaded fitting.

These parts are now in stock and ready to ship. It would be a good idea for all of you to have some of these fittings in your inventory in case you come across this situation.

Part #	Description	World Price	Picture
20.060	Cube Connector 1/8 (M) BSPT X 1/8 (F) BSPP - 25.5 Long	\$ 5.50	
20.061	Cube Connector 1/8 (M) BSPT X 1/8 (F) BSPP - 38.3 Long	\$ 6.75	
20.062	Cube Connector 1/8 (M) BSPT X 1/8 (F) BSPP - 51.0 Long	\$ 7.25	
20.063	Adaptor 1/8 (F) BSPP X 1/8 (M) BSPT x 7/8" Long – Brass	\$ 6.75	
20.064	Adaptor 1/8 (F) BSPP X 1/8 (M) BSPT x 1-1/4" Long – Brass	\$ 7.25
