Lubecore Invests in New

As part of the Lubecore Continuous Improvement Program, we have invested in top end machines (see sidebar) that will enable us to manufacture in our house.

Quality: With the reliability and accuracy of these machines, we will receive the highest quality connections.

Standardization: By using the Deutsch DT Series Feeder, we will bring standardization to our production process.

Click here for details on the [Deutsch DT Series Feeder](#)

Applications: With these machines, we will be able to produce harnesses for customized applications.

Additional details of the harnesses and their applications will follow in the near future.
