

## Lubecore Communication

### Subject: M6 Conical Fittings

In an effort to accommodate installation situations, Lubecore has developed another secondary line fitting. The M6 Conical fittings have an aggressive male thread. This will help in the situations where a  $\frac{1}{4}$  - 28 male thread fitting is not “grabbing” enough and spins in the hole.

**These parts are now in stock and ready to ship.**

Please order these fittings and have them in your inventory to accommodate the installation situations where you need them.

Part #	Description	World Price	Picture
20.056	Fitting, 5mm - M6x1 Conical Male	\$ 5.60	
20.059	Fitting, Cube, M6x1 Conical Male x 1/8"-28 BSPP Female	\$ 4.10
