

Lubecore Technical Announcement

Setting Adjustment Advisory

Please be advised of the factory setting change for two items available from Lubecore. The following settings are changing:

Part # 12.016: Timer - Truck Mark II – Std. Software 10V - 30V

Factory setting of run time is now being set to 1 Minute. Previously, this run time setting was 3 minutes.

Part # 10.814: Dual Line Reversing Valve

Factory pressure setting for switching pressure is now being set to 100 BAR. Previously, this setting was 150 BAR.

If you have any questions, please do not hesitate to contact Lubecore International.

Thank you for using Lubecore Products.
