

Lubecore Technical Announcement

Parallel System General Manual Update

Lubecore International has posted an update to the Parallel System General Manual on the Lubecore Portal. The cover page of the manual is shown on the right for reference.

Information which has been refreshed in the manual is as follows:

1. Pump pictures now feature top springs.
2. Pump part numbers updated
3. Pump Coating type updated.
4. Post September Truck Timer Harness wiring and terminal block diagrams added.
5. Current solenoid shown in the section titled "Solenoid Operation". Harness wire colors before and after September 2019 shown in the same section.
6. Pictures of low-level and pressure switches now feature Deutsch Connectors.
7. Trailer timer section has been replaced with the front mount timer information.
8. Schematic for the front mount timer board now shows the three-wire input (red, yellow, black)
9. The injector section has been updated to show the latest injector configuration.
