

## 20.207 Temporary Replacement

Lubecore is struggling with the current grid lock in global shipping as is the rest of the global economy. As a result, Lubecore is currently out of 20.207 elbow fittings. Until stock of 20.207's has arrived Lubecore will be shipping 20.060 and 20.208 fittings to make up a 6mm Elbow Compression Fitting.

*20.207 (Left) will be replaced with 20.060 and 20.208 (Right) until 20.207 parts become available again*

A follow-up communication will be sent when 20.207's are available again.
