

NEXT GENERATION AUTOMATED LUBRICATION

PNEUMATIC SINGLE LINE 210 PUMP

- Extend your component life
- Maintenance intervals are optimized for your application
- Chromatized pump body to prevent corrosion
- Clear reservoir with red follower plate seal for a clear grease level indicator
- Parts are compatible with leading competitive brands
- Various reservoir sizes available to meet your PM intervals
- Corrosion-proof mounting system

lubecore™

PNEUMATIC SINGLE LINE 210 PUMP

Lubecore™ Automated Lubrication Systems enhance your preventative maintenance program and keep your greasable components in excellent condition – resulting in safe and reliable equipment performance. This maintenance tool keeps your equipment on the road, earning you money!

Lubecore™ and the Environment

The Lubecore™ Automated Lubrication System reduces grease consumption by up to 75%! This means less grease ends up in the environment – saving money and the eco-system. Extended component life results in less energy used in producing new components, fewer resource minerals used, and less waste in our landfills – helping everyone meet their environmental targets!

Safety

The Lubecore™ Automated Lubrication System enhances the safe operation of your equipment by delivering continuous lubrication to critical components:

- Automatic brake adjusters
- Clevis pins
- Brake S cam bushings
- Spring hangers and bushings
- Fifth wheel plate

A well-lubricated fifth wheel enhances vehicle performance. “Fifth wheel steer” is minimized by continuous lubrication of the fifth wheel.

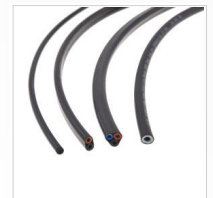

When driving in winter and off-road conditions, a significant increase in performance is reported by operators of equipment fitted with Lubecore™ Automated Lubrication Systems. Tire life is also extended because of a continuously lubricated fifth wheel.

Lubecore™ Automated Lubrication Systems also enhance ABS performance. This is achieved by keeping all your brake components in optimum condition so they can respond to the rapid commands of the ABS control module.

Lubecore™ Turnkey Solution

The Lubecore™ Automated Lubrication System is installed on your equipment by our trained professionals. Our expertise will guarantee that the automated lubrication system will meet your specific needs.

We also offer free, on-site training for your technicians and operators, through our extensive distributor network, which will help familiarize them with the system and ensure years of trouble free operation!
